FAQ

Naviswork 11-4-2016 Some of the presentations are not worth seeing to me. Some people do not know how to run a business, and they are using software as if it is an instrument. Some people do not have the ability to read, and they are using it as if it is a book. It will not help them. The software tools are necessary, but they are not always useful. There are a lot of tools to use as a business tool, but none of them will do you any good. You have to be able to read, write, and do mathematics. The software will not do these things for you. We have to figure out how to use the tools to do the things that are necessary, but we cannot use them to do other things. We have to figure out how to use the tools to do the things we want to do. That is what an engineer does. We have to figure out how to use the tools to do the things we need to do. That is what a business person does. We have to be able to use the tools to do the things we need to do, and not be limited by the tools. We cannot use the tools to do the things we want to do. I spend too much time on technology and not enough on the business. Technology is very important, but it is not the most important thing. The business is far more important. The business is what will make you successful.

```
import { Directive,
  ElementRef, OnInit, Renderer2, OnDestroy, ViewChild, ViewContainerRef } from '@angular/core';
import { Subject } from 'rxjs';
import { Buffer } from 'buffer';
export interface Options {
  required: boolean;
  regex: RegExp;
  customValidator?: (value: any, param: any) => boolean;
  min?: number;
  max?: number;
  message?: string;
}
@Directive({ selector: '[required]' })
export class RequiredDirective implements OnInit, OnDestroy {
  @ViewChild('validationMessages', { static: false }) public
  validationMessages: ElementRef;
  /** * Array of components to render for errors. */
  82157476af
